

Avian mating systems - Paarungssysteme bei Vögeln

- 2002 Rauter C, **Reyer H-U** & Bollmann K (2002): Selection through predation, snowfall, and micro-climate on nest-site preference in the water pipit *Anthus spinoletta*. Ibis 144: 433-444.
- 2001 Bollmann K & **Reyer H-U** (2001): Reproductive success of water pipits in an alpine environment. Condor 103: 510-520. Pasinelli G, Hegelbach J & Reyer H-U (2001): Spacing behavior of the middle-spotted woodpecker in Central Europe. J. Wildlife Manage. 65: 432-441.
- 2000 Rauter C, Brodmann PA & **Reyer H-U** (2000): Provisioning behaviour in relation to food availability and nestling food demand in the alpine water pipit (*Anthus spinoletta*). Ardea 88: 81-90.
- Rauter C & **Reyer H-U** (2000): Thermal and energetic consequences of habitat selection in breeding water pipits (*Anthus spinoletta*). J. Ornithol. 141: 391-407.
- 1999 Bollmann K & **Reyer H-U** (1999): Why does monogamy prevail in the alpine water pipit (*Anthus spinoletta*)? In: Adams, J. & Slotow, R.H. (eds.). Proc. 22 Int. Ornithol. Congr., Durban: 2666-2688. Johannesburg: Birdlife South Africa.
- Brodmann PA & **Reyer H-U** (1999): Nestling provisioning in water pipits (*Anthus spinoletta*): do parents go for specific nutrients or profitable prey? Oecologia 120: 506-514.
- 1998 Rehsteiner U, Geisser H & **Reyer H-U** (1998): Singing and mating success in water pipits: one specific song element makes all the difference. Anim. Behav. 55: 1471-1481.
- Reyer H-U**, Fischer W, Steck P, Nabulon T & Kessler P (1998): Sex-specific nest defense in house sparrows (*Passer domesticus*) varies with badge size of males. Behav. Ecol. Sociobiol. 42: 93-99.
- 1997 Bollmann K, **Reyer H-U** & Brodmann PA (1997): Territory quality and reproductive success: can alpine water pipits *Anthus spinoletta* assess the relationship reliably? Ardea 85: 83-98.
- Brodmann PA, **Reyer H-U** & Baer B (1997): The relative importance of habitat structure and prey characteristics for the foraging success of water pipits (*Anthus spinoletta*). Ethology 103: 222-235.
- Brodmann PA, **Reyer H-U**, Bollmann K, Schlapfer A & Rauter C (1997): The importance of food quantity and quality for reproductive performance in alpine water pipits (*Anthus spinoletta*). Oecologia 109: 200-208.
- Rauter C & **Reyer H-U** (1997): Incubation pattern and foraging effort of female water pipits (*Anthus spinoletta*). Ibis 139: 441-446.
- Reyer H-U**, Bollmann K, Schlapfer AR, Schymainda A & Klecack G (1997): Ecological determinants of extra-pair copulations and egg dumping in alpine water pipits (*Anthus spinoletta*). Behav. Ecol. 8: 534-543.
- 1995 Frey-Roos F, Brodmann PA & **Reyer H-U** (1995): Relationships between food resources, foraging patterns and reproductive success in the water pipit. Behav. Ecol. 6: 287-295.

1994 **Reyer H-U** (1994): Ecology and evolution of mating systems. Verh. Disch Zool. Ges.
1994 87: 97-113.
